

Slagelse Municipality – Integrated day care institution – Vejsgården in Vemmelev

Slagelse Municipality has chosen Creo Architects and Damgaard Consultant Engineers as total consultants when preparing a project for approx. 522 m² large integrated day care institution for children at Vejsgården in Vemmelev by Korsør.

The task consists of renovating/rebuilding Vejsgården's existing farmhouse in 2 floors with a total of 376 m² and the construction of a 146 m² extension within the framework of the local plan.

New construction is built as energy class 1 construction.

Sewage for rainwater and wastewater in soil is connected to existing sewers. Existing cables under and around the building will be rerouted or removed to the extent necessary. New sewers are being established from new toilets, side rooms and to the extent that changing, and bathing facilities are carried out - carried in the ground / under the building, with ventilation over the roof. Rain Water system via Faskine.

Execution: 2010 - 2011

Client: Slagelse Kommune, Michael Käsner
